Subject: Urgent Update: Tariffs on Chinese Imports

Dear NFA Members,

We are writing to inform you about recent developments concerning tariffs on fireworks imported from China. On January 31, 2025, the White House announced a 10% tariff on imports from China, effective February 4, 2025. This action is part of a broader trade initiative that also includes tariffs on imports from Mexico and Canada. More information can be found at <https://www.whitehouse.gov/fact-sheets/2025/02/fact-sheet-president-donald-j-trump-imposes-tariffs-on-imports-from-canada-mexico-and-china/>

These tariffs are expected to increase costs for suppliers, retailers, and consumers within our industry. The National Fireworks Association is actively monitoring the situation and collaborating with industry leaders and policymakers to advocate for fair trade practices that support our members.

We encourage all members to stay informed and prepare for potential adjustments in pricing and supply chain logistics. We will continue to update you as more information becomes available. Thank you for your dedication to our industry.

Best regards,

Stacy Schneitter Blake

President - National Fireworks Association
